for all sizes of shield (screen) clamping saddles

Using a stand off  
with a special slotted carrier rail

Addition of a shield (screen) clamping saddle.

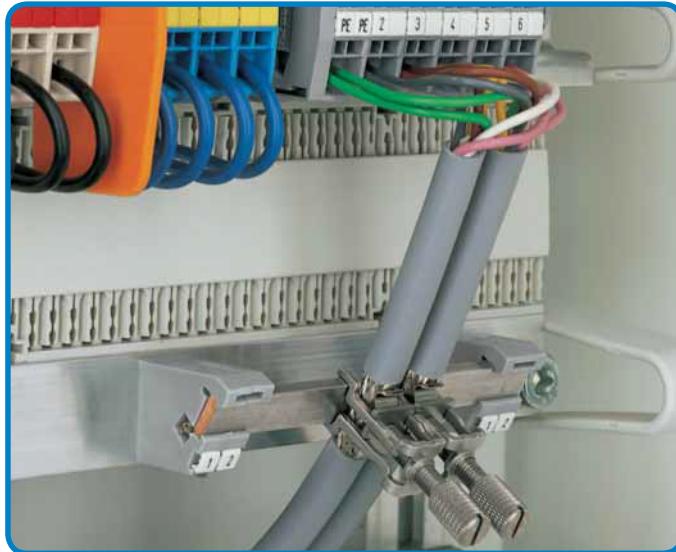

Tightening/releasing a shield (screen) clamping saddle. To attach the clamping saddle, tighten the knurled screw. To remove, unscrew until ratcheted mechanism is released, then slightly tip saddle and remove the clamping saddle.

## Mounting Options Based on Application

- carrier with grounding foot, busbar parallel to the rail

- isolated mounting carriers for a common shield (screen) reference potential, independent of the housing potential

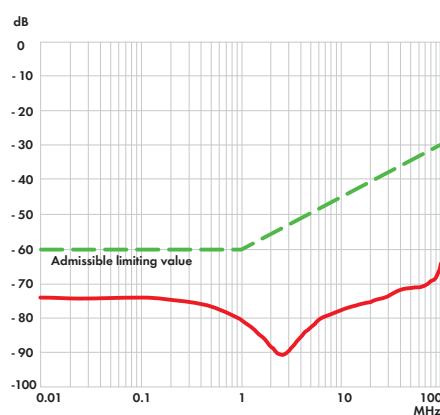

- U-shaped copper busbar 10 mm (0.394 in) x 3 mm (0.118 in)

- snap into any metal plate up to max. thickness 3 mm/0.118 in

### Hole dimensions for panel mounting

The WAGO shield (screen) connecting system is highly effective because the clamping unit can be brought very close to the unshielded part of the cable. Additionally, the spring material is part of the clamping saddle, giving good electrical connection and compensating for any deformation in the braiding. The system also acts as a partial strain relief.
