

# Remanufacturing with Schneider Electric and BPX

## Faulty Device? Remanufacture and contribute to your sustainability goals.

We know what it takes to keep industry moving. Working together with Schneider Electric's UK remanufacturing centre, we offer the highest standard remanufacturing service.

- Know exactly what you're committing to, with fast turnaround remanufacturing of **Schneider Electric variable speed drives (VSDs), PLCs, HMIs, and Servo and Stepper motors** at fixed prices.
- Backed by a 2 year warranty, this high-quality remanufacturing extends the life of your critical automation device.

Not only is this a sustainable and efficient service, you will also benefit from detailed reports to help you minimise the risk of failures reoccurring.

Who's better suited for remanufacturing? Trust BPX and Schneider Electric's engineers to extend the life of your Schneider Electric automation device.

- BPX has the largest network of industrial control and automation branches in the UK and Ireland.
- Benefit from specialist assistance and diagnostics with state-of-the-art equipment.
- Work with engineers qualified by the original equipment manufacturer.
- Schneider Electric use high-quality, original replacement components and replaces not just the faulty parts, but also all components that could show signs of degradation.

Schneider Electric and BPX | Safe, Secure, Sustainable Services.

## Schneider Electric's Remanufacturing Service in 5 Simple Steps

1. Your Schneider Electric automation product is out of warranty and has developed a fault.
2. Visit the BPX website using the QR code below and simply enter the official Schneider part reference followed by RE to search for the cost of a fixed priced remanufacture, or contact your local branch.
3. We will acknowledge your purchase and facilitate the remanufacture of the product.
4. Depending on the product and issue, the turnaround time is approximately 4-6 weeks.
5. Congratulations! You will have successfully contributed to reducing your organisation's carbon footprint by remanufacturing versus buying new.

### Benefit from:

- Device remanufactured by Schneider Electric's expert engineers.
- Replacement original parts and components assured.
- Extended 2 year warranty on your remanufactured device.
- Minimised unplanned downtime.
- Detailed reports to help you minimise the risk of failures reoccurring.
